

6 'SYSTEM UPDATES' ARE REQUIRED

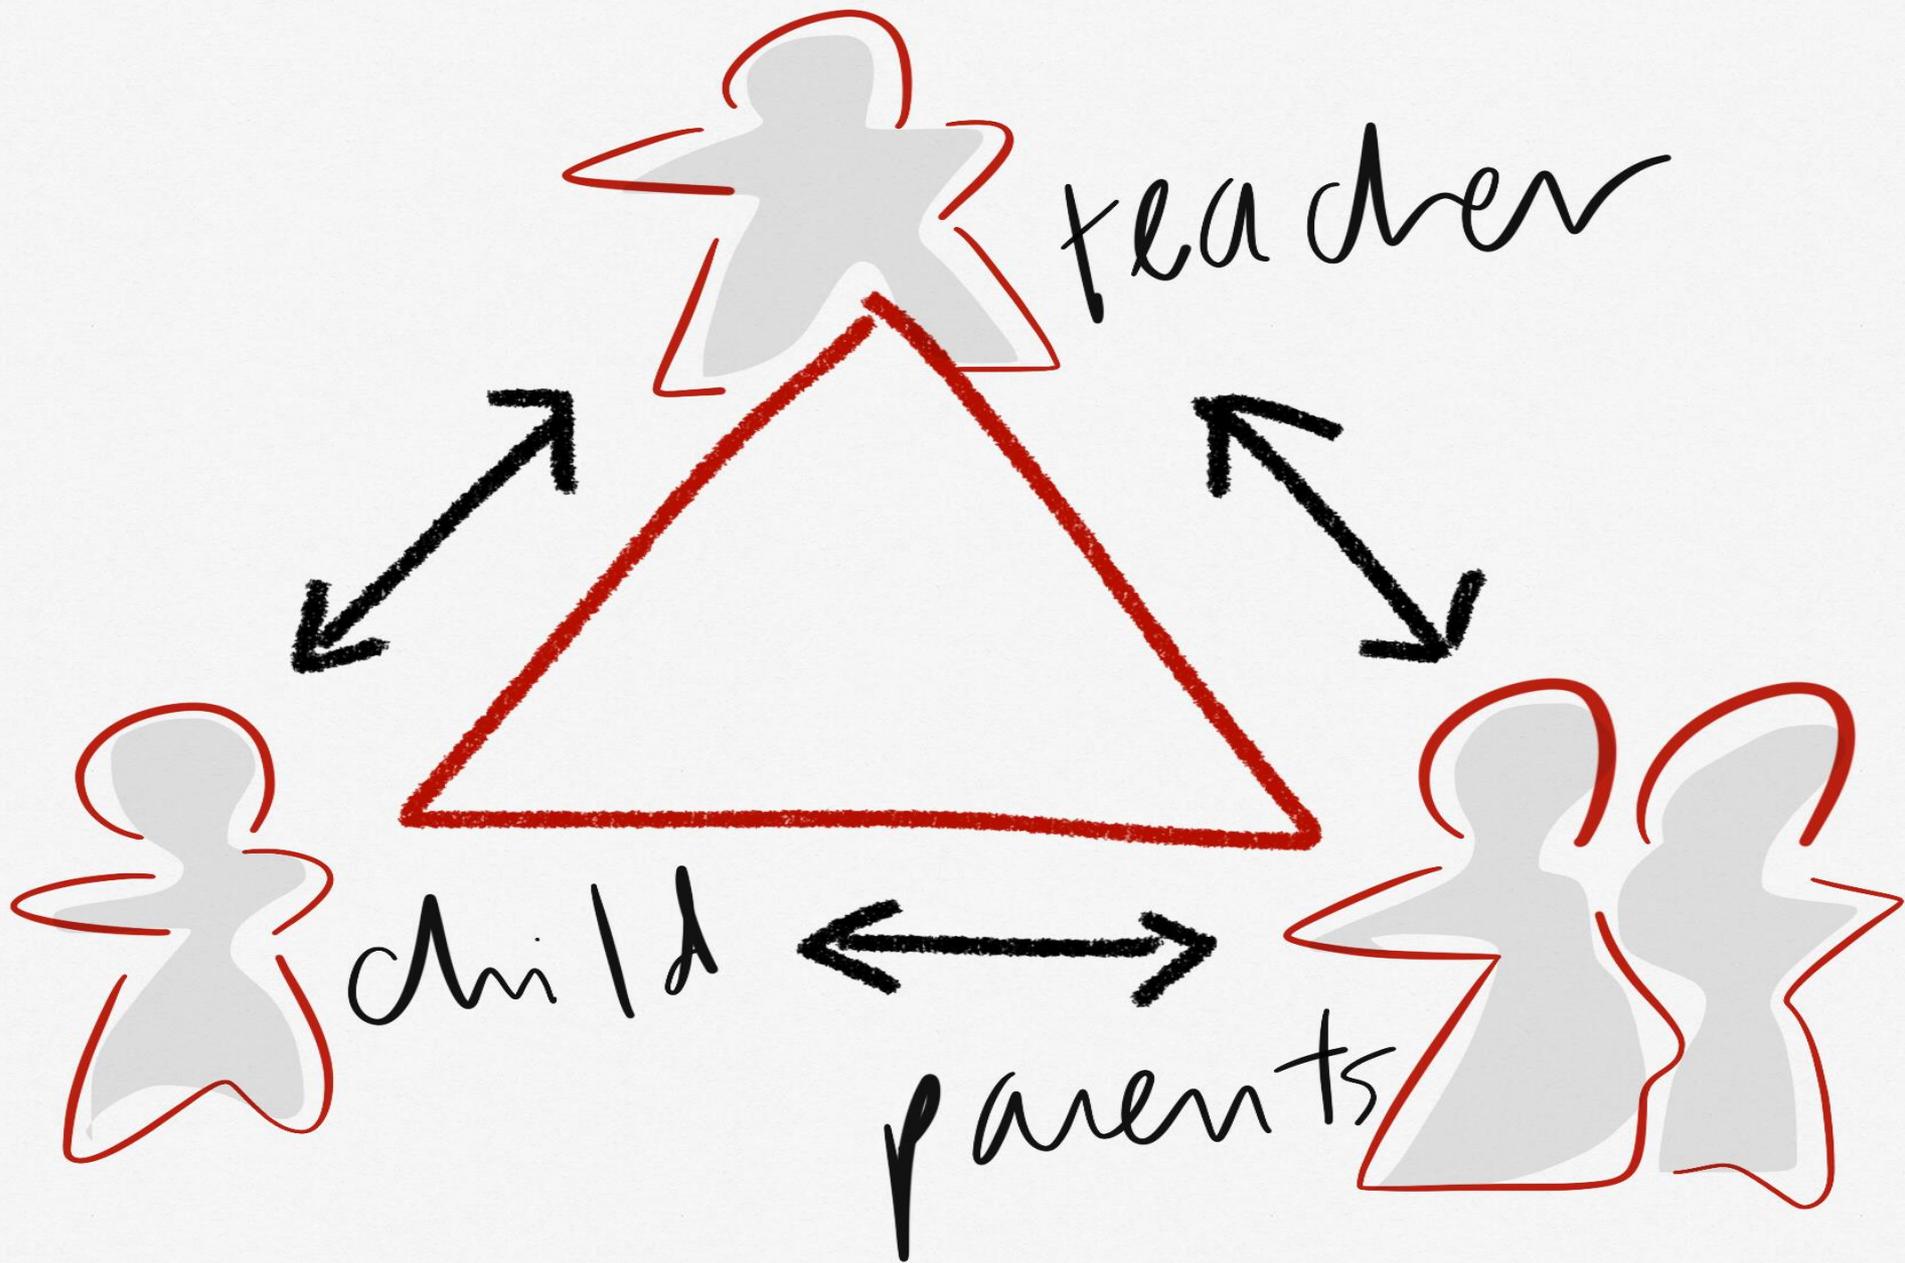

Donald Ewing

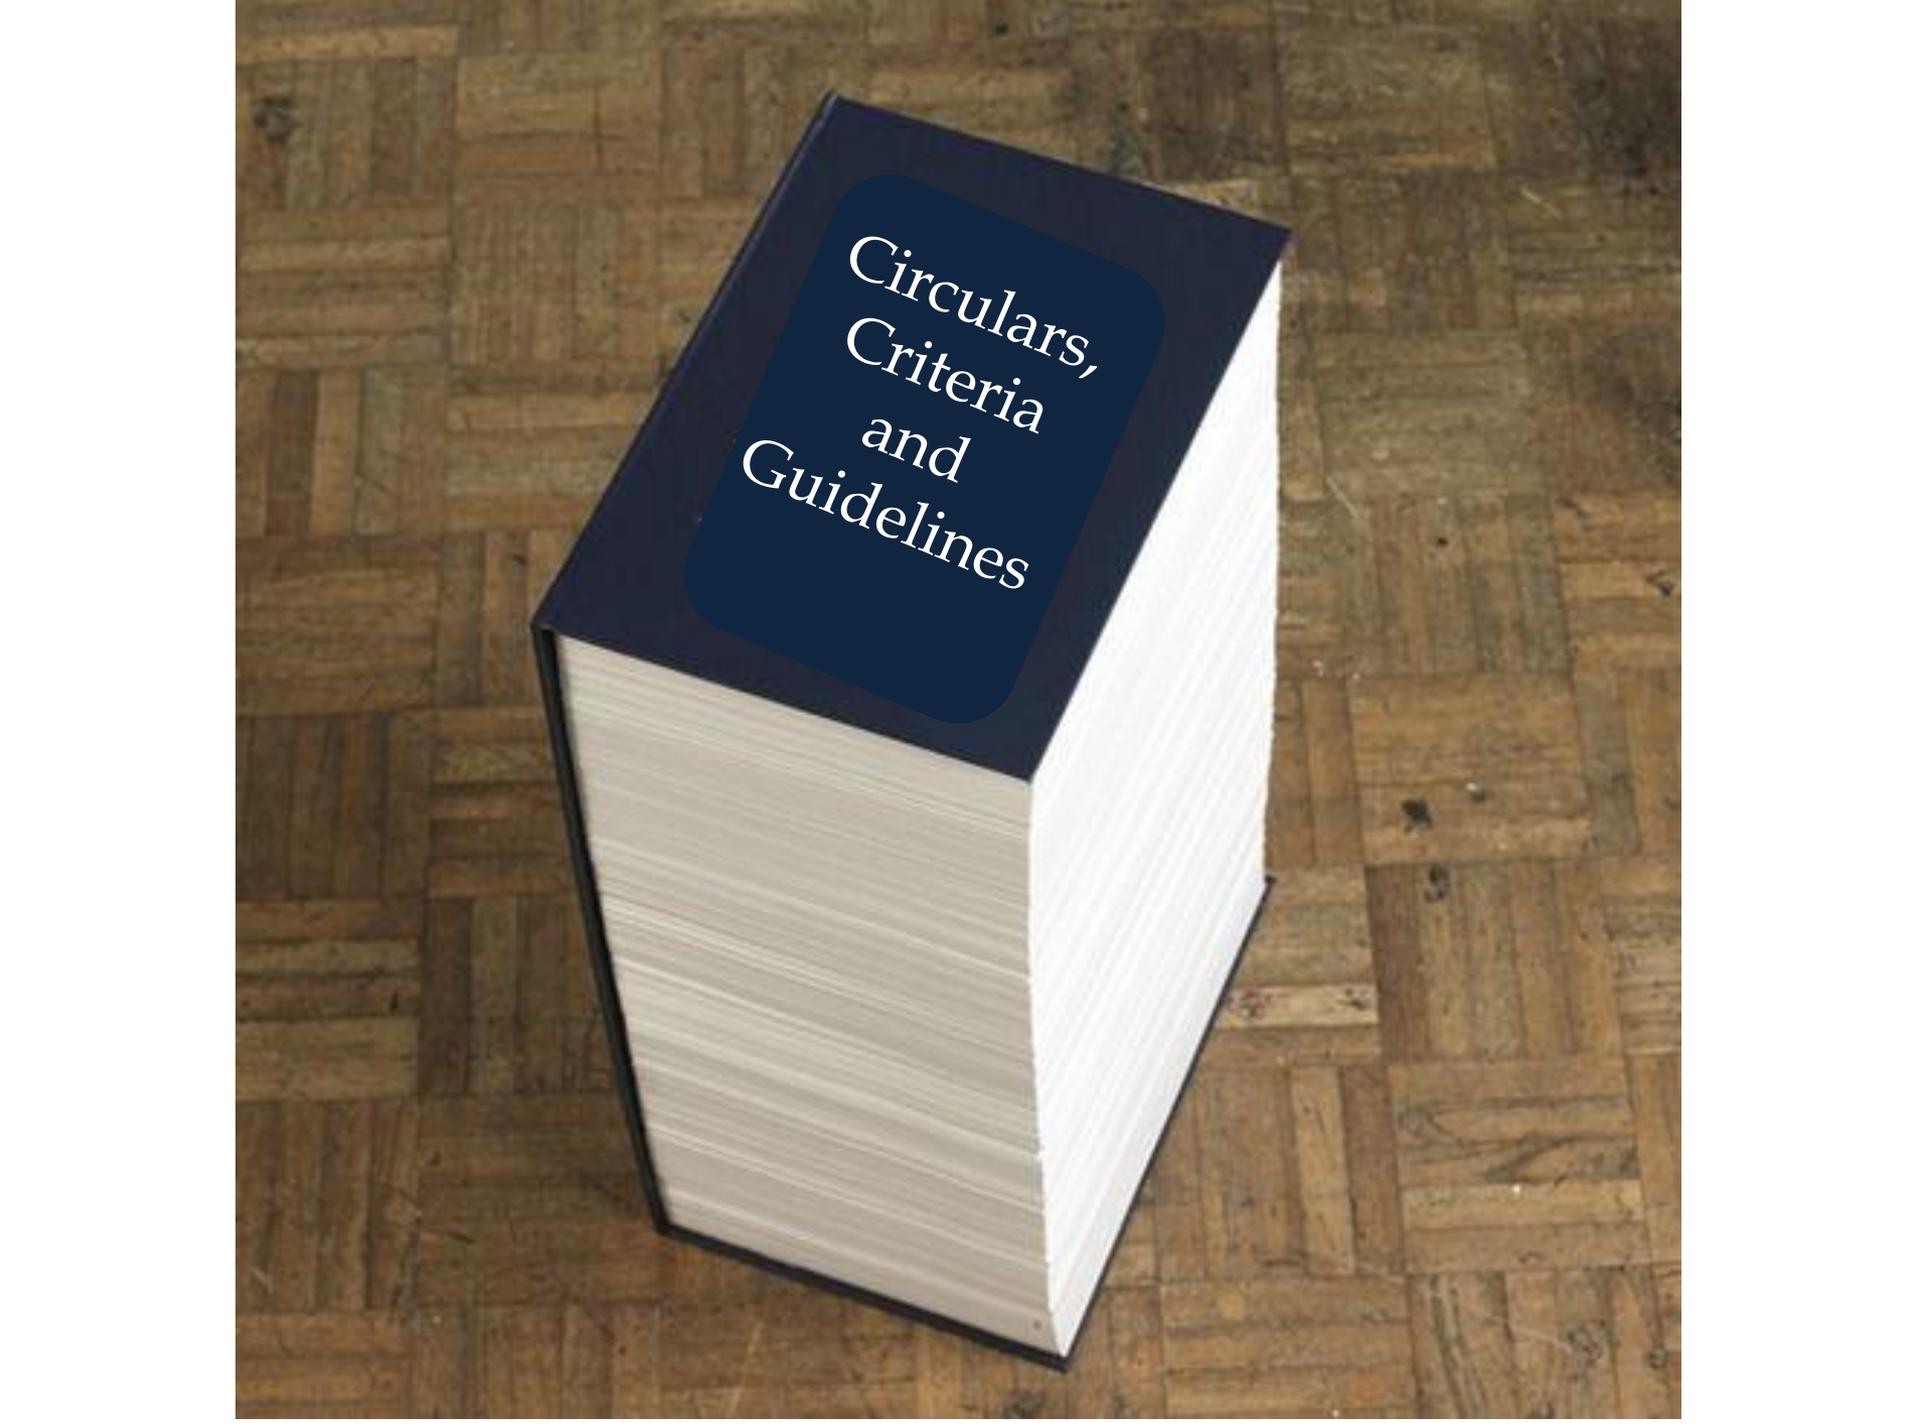

Parentline Conference

29th January 2016

THE SYSTEM NEEDS TO:

1. Absorb Diversity
2. Listen to Parents
3. Have sensible guidance, clearly communicated
4. Show leadership – at all levels
5. Be financially realistic
6. Look forward (optimistically)

Visible light from black holes detected for first time

Scientists observing V404 Cygni discovered that even amateur telescopes are capable of capturing violent outburst from black holes closest to Earth

A NASA illustration of a supermassive black hole. Before the V404 Cygni observations, similar outbursts had only been seen as intense flashes of x-rays and gamma-rays, using high-spec telescopes.

Photograph: Nasa/Reuters

Astronomers have discovered that black holes can be observed through a simple optical telescope when material from surrounding space falls into them and releases violent bursts of light.

THANK
YOU!
